— Your Urban Farmer —

## KITCHEN GARDENING TURN ANY SPACE INTO A BEAUTIFUL HYDROPONIC FARM

---

PlantMe Agro Solutions Pvt. Ltd. helps you grow your own nutritious food through soilless farming techniques using Hydroponics, Cocopeat and Organic solutions throughout the year.

## THE STORY

Hello world! PlantMe is here. We are a brand new sustainability driven venture, run by veteran eco farmers & entrepreneurs. Our world is ever changing and this new age comes with new needs. For years, we have been suffering because of an unbalanced lifestyle and lack of quality resources within our reach. Our journey in search of healthy eating led us back to our roots, farming like the good old healthy people. With the help of technology and rigorous research we have developed ways to achieve optimum yield with minimum investment and long term sustainability. We believe, that there are others like us out there seeking natural and healthy food without any harmful additives. So here we are sharing our garden, our mantra & more....

# WHAT WE OFFER

## Our service and products

### Hydroponic NFT system for Leafy greens

Nutrient film technique (NFT system) is one of the best methods in hydroponics, used to grow smaller and quick growing plants like Palak, Spinach, Mint, Kale, Lettuce, Bokchoy, Coriander etc. Nutrient solution mixed water is pumped into the grow channel by the help of a mini submersible pump and unused water nutrient solution will be recycled through a drained food grade pipe. Leafy greens system can easily be set and grown, even in your shady balconies.

### Benefits of NFT System

Easy to control pests

Very modular and expandable.

Low water and nutrient consumption.

Avoids the usage of excess growing media.

Consistent flow prevents salt build up in root area.

Easy to observe root quality and health.

Re-circulating, hence minimal groundwater contamination.

### Hydroponic Dutch bucket system for Fruity Vegetables

Dutch buckets are an easy approachable way to begin hydroponics. You can grow a variety of plants with the Dutch Bucket and also allows growers to grow large, vining, fruiting crops like Cucumber, Tomatoes, Capsicum, Chilly, Brinjal, Ladies finger and many more..!

PlantMe is helping to set up hydroponic fruity vegetable system (Dutch bucket system) in Polyhouse.

### Benefits of Dutch Bucket

Space Saving

Flexible in size and setup

Convenient pest control

Recirculates water and nutrients

Great for fruit-bearing vegetables

# Hydroponics Home Kits

Our hydroponic Home kits are compatible, eye-catching, easy to manage and perfect for your balcony and outdoors for producing all kinds of leafy greens.

High Quality

Food grade channels

Rust resistant

Powder coated GI pipes

We all know that a high quality input will yield a higher quality output. PlantMe hydroponic home kit will help you grow your own food in a sustainable and healthy way without much effort.

## Items included In Hydroponic Kit

Growing medium in net cups

TDS Meter and Good Quality Reservoir

High Quality seeds

Free training in Hydroponic NFT system

Nutrient solutions

Submersible water pump

24 X 7 Customer Support

**Hydroponic Home Kit for 24 Plants**

## Ventilated Polyhouse

PlantMe Polyhouse helps to shield crops from excess cold or heat and unwanted pests. We recommend fruity vegetables to be grown inside a polyhouse for better results.

### Benefits of polyhouse

Crops can be grown throughout the year

Reduce disease in plants, control pests

Controlled Temperature

Keeps the insides of your home cool

### Items in our Polyhouse

High quality GI Pipes

Exhaust fans with louvers

Can be set even in 100 sqft

NVAC [Natural Ventilation Augmented Cooling] Technology to reduce temperature inside Polyhouse

Sides are covered with high quality insect net

Air circulation fans to increase air movement inside the Polyhouse

Multi layered film for reduction of sun radiation and UV blocking

## Why Us ?

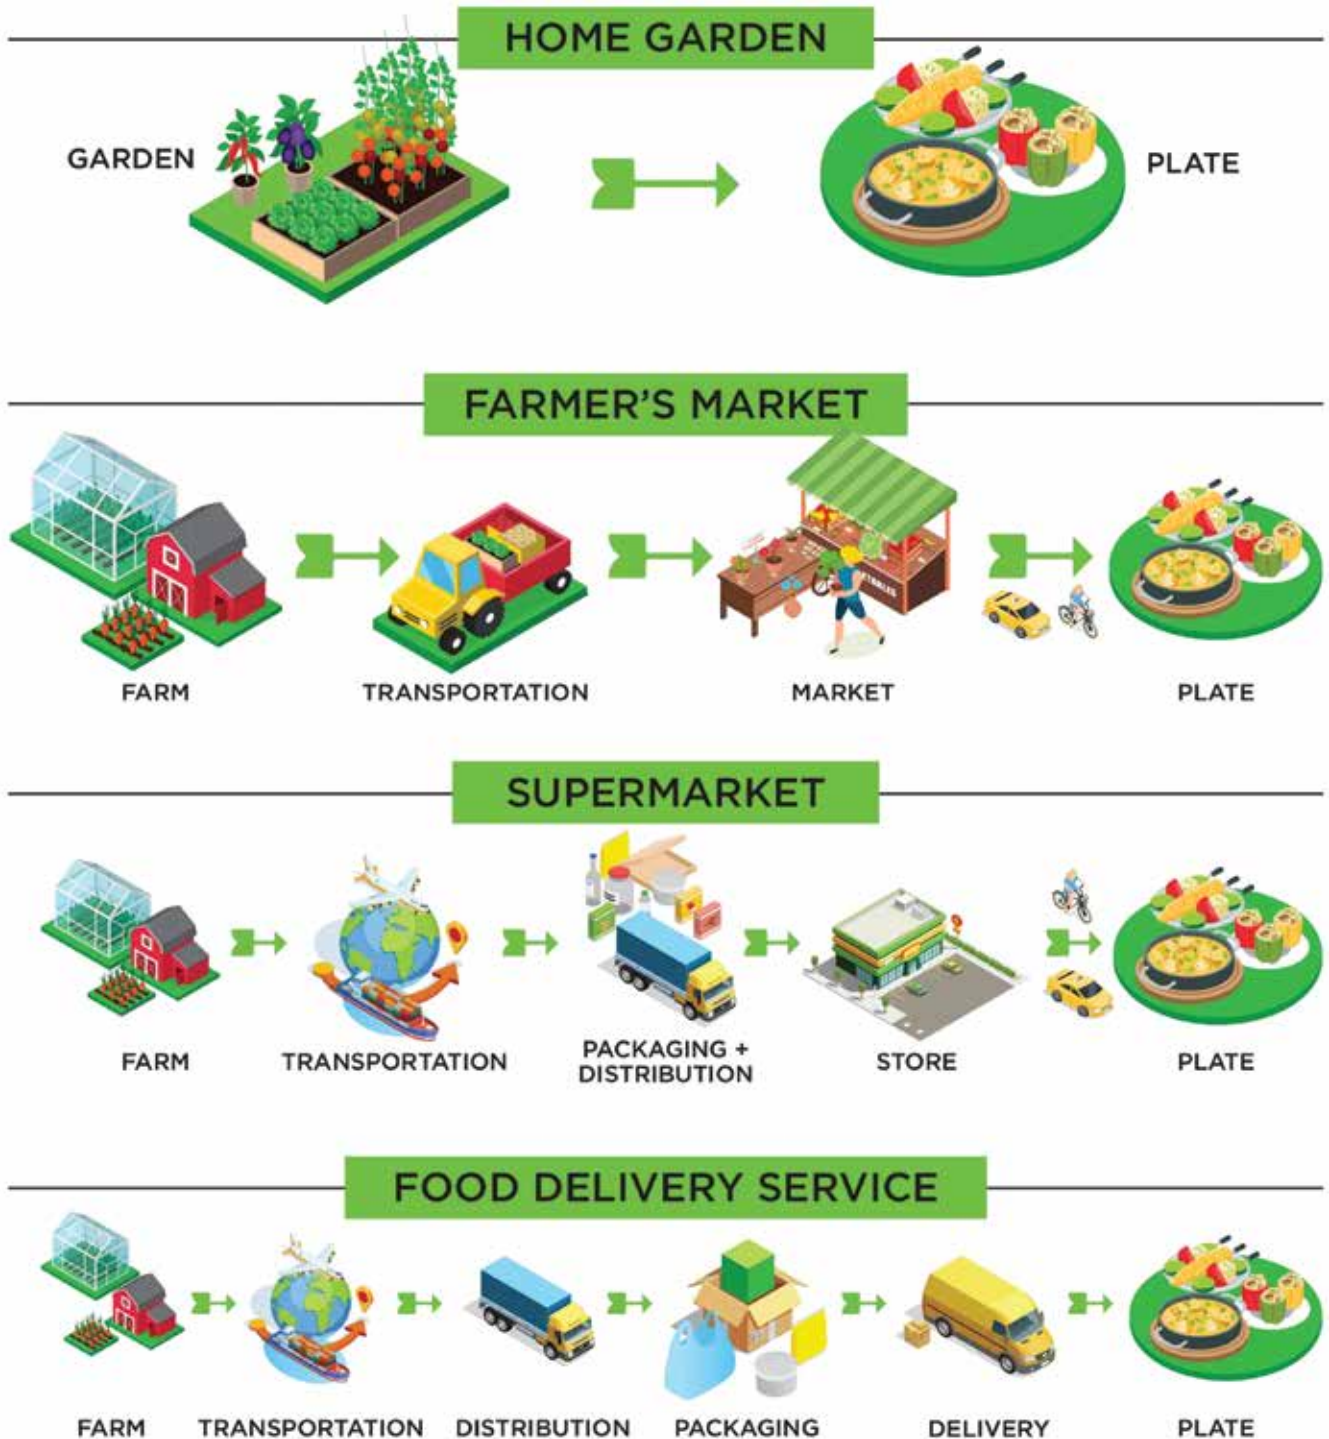

With our state of the art design and gardening solutions, we can create for you the most efficient and aesthetic space which is much superior to anything else available in the market. Our semi grown & quality checked plants are sturdy, resilient and of minimum maintenance too. But above all, our promise is to support you with a healthy lifestyle at a sustainable cost.

# Shortening the Food Chain: Farming in the City

Large-scale commercial agriculture uses chemicals intensively and has ruinous environmental impacts. Long-distance food transport boosts our carbon footprint. And food safety problems related to commercial agriculture are a growing concern.

PlantMe can help you make organic vegetables at home and bring down the need to buy from the market, hence save money, eat food free from pesticides, preserve food for future and stay healthy.

**OUR  
CUSTOMER'S  
VOICE**

"Excellent concept . Home kits are made of high quality food grade pipes and very easy to use. Thank you PlantMe for the awesome customer experience."
